

At Warehouse Partners we offer a unique co-operative approach. We supply products and services direct to manufacturers and suppliers of Storage Solutions and Materials Handling Equipment. These products and services are the non-core product items that absorb a lot of time and effort sourcing and managing within quotations and projects. Normally these items would require dealing with many different companies.

We focus on excellent service as well as good quality products, to make our business partners more efficient. Warehouse Partners expertise on indirect selling gives our business partners the comfort that their trade partners are getting the service levels they need.

By bringing together a range of products from several brands for the trade under the one roof, we are able to offer excellent service level combined with the integrity that comes with an indirect sales organisation.

The Product ranges currently available are:

- Location labels, aisle markers and identification products.
- Back of rack safety netting and other safety netting products.
- Flow Storage for Pallets and Cartons.
- Safety products and internal line marking.
- Floor coating contractor partnering service
- Label holders to provide a range of ID solutions for shelving.
- Load Notice Signs (SEMA signs)

## Labels and Signs

The ASG Services has got a huge range of experience in providing Identification systems for the UK's largest distribution companies and buildings. We have a large range of state of the art digital printing, print finishing and sign making equipment able to handle the largest projects within the shortest possible time.

**Our solution can be installed twice as fast as traditional Anti-Collapse Mesh at a rate of approx 400 square meters per day. It is more competitive, safer and quicker to install. Why would you use anything else?**

## Safety Netting

Rack Nets Limited has developed a modern alternative to Anti-Collapse Mesh at the back of racks, as well as many other innovative solutions for use in the warehouse. Netting solutions are the future for safety as the traditional solutions have limited benefits for the user.

The 'Back of Rack' safety netting has been developed to overcome many issues seen with other netting solutions and gives a wide range of benefits that include:

- Zero Maintenance even when loads have fallen
- Fully independently tested for full pallet load falls (not with Anti-Collapse Mesh)
- Fast Installation at approximately 400 sq. metres per day
- Competitively priced as supplied even without the installation cost benefits
- Easy to install, even in confined spaces.
- All parts made to the exact requirement, so no cutting of wires or folding of nets.
- Choice of colours as standard
- No high tension in wires and therefore low impact on the rack
- Low wire tension controlled by pre-set tools provided
- Very low net deflection
- Free Delivery

## Flow Storage

Warehouse Partners can offer very competitive solutions for any form of Flow Storage including Cart Push Back, Roller Pallet Flow (FIFO and LIFO) and Carton Flow. We have agreements with suppliers that can bring you high quality solutions at very competitive prices. Our extensive experience in this field is available as a free service to you to enable you to confidently supply the right solution. We can work with you in the design process and as an indirect operation offer complete confidentiality. From detail in the products through to the application as a concept in the warehouse, including stock analysis to find the areas of benefit, our experience is second to none in the British Isles.

## Warehouse Safety Products

Warehouse Safety Products: Warehouse Safety helps with Personnel segregation products and line marking installation and safety advice directly to end users. As part of the Warehouse Partners offering we are able to take all elements of the Warehouse Safety offering and support our industry clients where ever required.

As one of the UK's premier internal line marking contractors we are able to provide line marking installation services across the UK using a range of different preparation methods and paint and resin materials. Warehouse Safety has been at the forefront of internal line marking development for many years and continues to find new ways and products to make floor marking more and more successful.

As part of the Warehouse Safety offering we are able to manufacture site safety signs specifically for your clients' site using our wide format digital solvent ink printer and finishing equipment.

## Floor Coating Systems

Warehouse Partners can also assist you with floor coating systems with our partner , Resin Services Limited (RSL). RSL is one of the UK largest manufacturers of Epoxy and Polyurethane floor and wall coating systems and screeds for use across a complete range of market sectors. With over 20 years experience in manufacturing a range of specialist materials we have selected RSL not only for their expertise in epoxy and PU manufacturing but also their knowledge of contacting.

In order to achieve this Warehouse Partners will discuss your clients flooring problem with you and then establish with RSL who will be the most appropriate specialist contractor for you to use. Warehouse Partners and RSL will then step aside and let you discuss the contract directly with the contractor and so keep the expertise specific and relevant.
